

**NATIONAL TECHNICAL UNIVERSITY OF ATHENS
INTERDISCIPLINARY POSTGRADUATE PROGRAMME
MSc “COMPUTATIONAL MECHANICS”**

**CALL FOR APPLICATIONS FOR POSTGRADUATE STUDIES
FOR THE ACADEMIC YEAR 2026-2027**

Organization

The Schools of Chemical Engineering (coordinating), Mechanical Engineering, Civil Engineering, Naval Architecture and Marine Engineering, Applied Mathematics and Physical Sciences of the National Technical University of Athens offer the **Interdisciplinary Postgraduate Program MSc “Computational Mechanics”** and call for applicants to express their interest in participating at the MSc Program in the academic year 2026-2027.

The MSc Program “[Computational Mechanics](#)” has been included in the internationalization project of NTUA postgraduate studies. Internationalization relates to the project “Support of internationalization actions of the postgraduate studies of the National Technical University of Athens” (MIS 6004804), co-financed by Greece and the European Union through the Operational Program “Human Resources and Social Cohesion”. Internationalization aims to attract international students, and to promote the research and educational activities of NTUA. In this context, the language of instruction is English.

Program aim and objectives

The MSc program provides high-level postgraduate studies in the development and use of computational methods leading to the effective and detailed modelling and simulation of natural phenomena and engineering processes and systems design, aiming at the solution of challenging scientific and technical problems. The program provides extensive interdisciplinary knowledge that enhances and complements the knowledge of engineers of various specialisations, as well as other scientists who are interested in computing. The overall aim is to prepare the student for either industrial employment or further research, with an internationally competitive specialization.

Program structure

The program, with a minimum duration of three (3) academic semesters for completion and maximum study period of four (4) semesters, leads to the Diploma of Postgraduate Studies - Master of Science, and is equivalent to 90 ECTS. The study [program](#) includes core and elective courses, with computational or laboratory classes, the attendance of which is obligatory. The MSc is awarded after the successful attendance and examination of 9 obligatory and elective courses in the first two semesters and the elaboration and successful presentation of a Postgraduate Diploma Thesis in the third semester. Computational Mechanics is covered in a unified framework and the distinct directions offered by the elective courses are in Processes, Constructions, Materials, and Environment-Energy.

Eligibility

Graduates from the National Technical University of Athens and from other Engineering Schools/Universities, as well as graduates from related subjects, are eligible for attendance in the program. The program is open to graduates of Greek Universities or equivalent foreign universities recognized by the Hellenic National Academic Recognition and Information Center - NARIC ([DOATAP](#)). Students graduating in September 2026 are also eligible.

Co-funded by
the European Union

Human Resources
and Social Cohesion
Programme

Applications from international students are welcome. Non-EU students must pay tuition fees of 500 Euros per studies semester.

A maximum of forty (40) students will be enrolled in the MSc program, upon selection, provided that they meet all the necessary admission requirements. In the selection criteria of postgraduate students.

Application process

The attached Application must be sent to compmech@chemeng.ntua.gr

At the same time Interested candidates are invited to fill in the E-form in the relevant [link](#) until **Friday June 12th, 2026**, and upload the following documents:

- Curriculum Vitae (in English)
- Transcripts of records from universities attended (in Greek or English)
- Certificate of fluency in English

Additionally, candidates should request two letters of recommendation to be sent directly from the reference to compmech@chemeng.ntua.gr before the deadline of the current call.
